Masters in Information Technology (Discontinued)	2016 - 2019
Charles Sturt University	Melbourne, Australia
Computer Science Engineering	2011 - 2015
TKR College of Engineering and Technology	Hyderabad
Board of Intermediate	2009 - 2011
Sri Chaitanya Junior College	Hyderabad
ICSE	2009
Siva Sivani Public School	Hyderabad

PROJECTS

Conference Website (preconference.ccbp.tech)

Developed a Conference website where users can see information about conference like attendees count, workshops, speakers and countries attended, after movie of conference.

Technologies Used: HTML, CSS, Bootstrap

- Implemented mobile friendly layout using different HTML block, inline elements, and styled using CSS3 properties such as background, flex and CSS box model properties.
- Implemented Conference video using bootstrap embed component

Countries Search (premcountry.ccbp.tech)

Developed responsive countries search application which shows all countries and respective populations in the world. We can also search by specific country.

Technologies Used: HTML, CSS, JS, REST API Calls, Bootstrap

- Fetched countries list from a server asynchronously using fetch GET HTTP API call and implemented responsiveness using Bootstrap grid system and CSS box model
- Implemented local search functionality by using input element, JavaScript event listeners & filtered countries using the Array filter method.

Wikipedia Search Application (premwikipedia.ccbp.tech)

Developed custom Wikipedia search application where users can search and view curated results and can see detailed explanations in Wikipedia by clicking on the specific result.

Technologies Used: HTML, CSS, JS, REST API Calls, Bootstrap

- The displayed list of search results with HTML list elements with hyperlink as URL, styled list using CSS, Bootstrap, and implemented responsiveness using Flex properties and CSS Box model.
- Fetched search results from a server asynchronously using fetch GET HTTP API call. When a user clicks on a particular result, opens the website in a new tab by using the target attribute of the anchor tag in HTML
